Software engineering student that has worked for sales and technology companies like Apple and Citibank while growing technical skills, currently a junior at University of Maryland University College with a 4.0 GPA. I currently co-founded a small app with a couple of my friends that I currently manage using agile scrum management techniques, and have designed the UX/UI myself.

## Experience

2017-01 - present **Co-Founder and Lead Developer**

*NearbyMedic, Software Engineering*

Configuring HIPAA compliant cloud architecture, chat, and videoconferencing for patient to doctor communication and service. Building geolocation, database, and authentication stacks as well. Also designed custom assets for all screens in Sketch, Axure RP 8, and Flow. I currently have 2 direct reports who i have extensive experience in implementing project management techniques, being the scrum master for scrum/agile development, and implementing lean startup methodologies.

Developing iOS application using Swift, Objective-C, and Firebase

Developing Android application using Kotlin/Java

Developing Web app using HTML, CSS, and various javascript libraries/frameworks such as ReactJS, AngularJS, etc.

2013-10 - 2017-05 **Product Specialist**

*Apple Inc., Sales & Training*

Provided technical and sales consultant solutions for apple clients, worked with business team to connect with high profile business and government customers, was trained in various services and technical aspects to apple technology including repairs, customer service, customized sales, and various other skills. Also taught Apple customers on using different apple operating systems, software, and hardware through workshops/classes and one to one interactions. As a part of the visuals team worked overnight to maintain apple displays, replace new and old products and also maintain planogram updates for products on wall and do inventory.

2018-01 - present **University of Maryland University College, Computer Science B.S (in-progress)**

2012-08 - 2014-05 **Northern Virginia Community College, Computer Science A.S**
